

1. Productname

Nenko Interactive - Glow cube

2. Product code

22012134

3. Short description

The Interactive Glow cube is a versatile and colourful cube that can be easily controlled with the Nenko Interactive switches. This allows you yourself, or your client, to determine the colour of the cube, providing an interactive and personalised experience. In addition, the cube can also change colour automatically, creating a dynamic and soothing effect. This glow cube is ideal for sensory stimulation and offers endless possibilities for use in snooze rooms or therapeutic environments.

4. Content

1 x glow cube
1x small remote control
1x adapter

5. Sensory stimulation

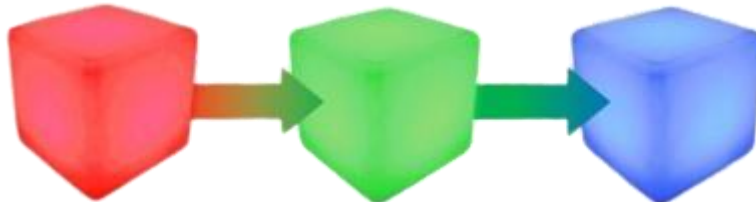

Sight

6. Product specifications

Height: 40 cm
Width: 40 cm
Depth: 40 cm
Weight: 4 kg

7. Use

Captivate users with this interactive LED colour-changing cube. With its durable polyethylene plastic construction, it is suitable for use as furniture as a chair or table, indoors or outdoors (waterproof IP65).

A remote control is included with each colour-changing cube. Use it to select one of 16 colours, set the brightness level and switch between Flash/- Strobe/Fade/Smooth modes, to suit the user's needs.

This interactive version of the glow cube can be used as a receiver for various remote controls. It can be paired with one of these compatible transmitters, along with other products, to be controlled remotely

Ideal for educational and play activities.

To make the cube completely versatile, it can be powered in two ways:

1. Connect it to the mains using the power supply provided.
2. The power supply can be used as a charger (8 hours of charging). Once fully charged, the cube can be used wirelessly for up to 10 hours (depending on the setting).
